Meeting with [] CA Staff

25X1

Believes CA Staff will most likely have the greatest contribution from the DDP. Staff is greatly concerned on the security aspects. [] reassured on this score - several levels of security, screened by originating components, etc.

25X1

[] had meeting with all components of CA Staff and came up with list of items which seem to be most relevant.

25X1

[] stated basic criteria for selection of material is whether it is of interest to the Johnson administration. This can be based on expressions of interest from Johnson aides and executive secretaries as well.

25X1

It would appear that every CA project is involved to a certain extent - all projects were submitted to the 303 Committee and CA supplied massive amount of material and papers on policy approvals, etc. to the committee.

[] believes that if it develops that a large number of papers are selected for the library project, they will have to be accompanied by some kind of covering essay to tie them all in together and give some historial background. Proposes the preparation of a survey or several surveys at staff level, giving overall subject, with supporting attachments to be kept here. [] stated that we are trying to avoid a large number of essays, and will prepare them only on large subjects and they will not be too specific.

25X1

25X1

There will be several levels of sensitivity, with decisions as to levels of specific papers being made by originating components. Drafts and backup reports should probably be included.

25X1

In answer to [] query, [] stated that the 303 Committee minutes and individual CA staff submissions will probably be included.

[] said he had found it useful to go through the NSGAMS. They serve as a sort of index of what the White House was interested in. The most recent one was in [] office - No. 352 in July 1966.
